Replacement Sheet

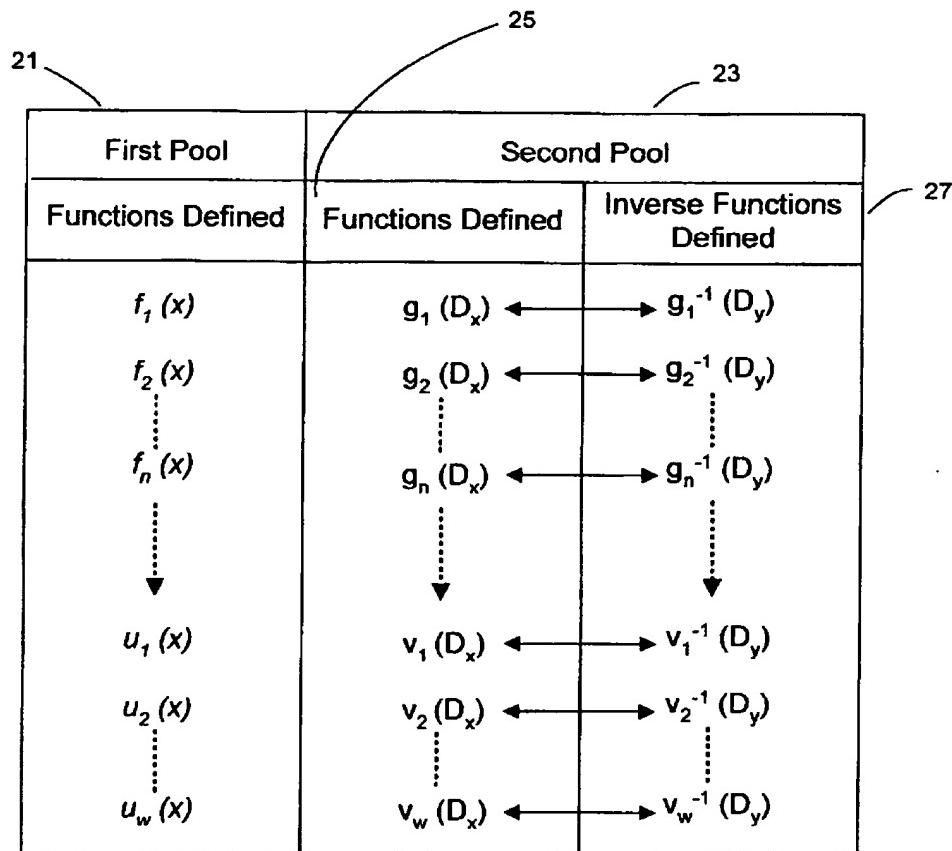

FIG. 3

Patent Application Publication Nov. 7, 2002 Sheet 4 of 14 US 2002/0164020 A1

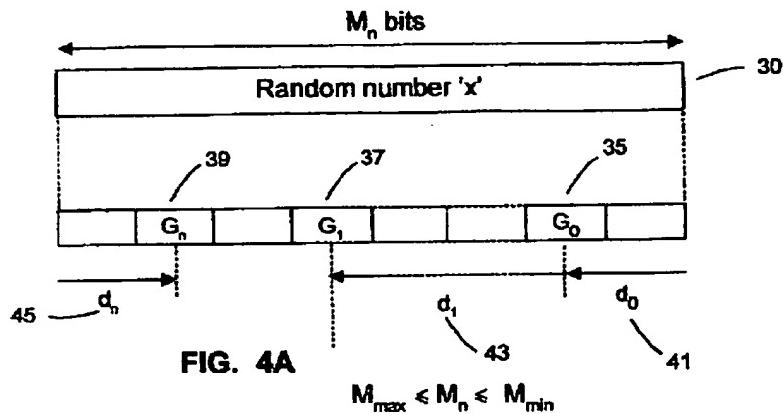

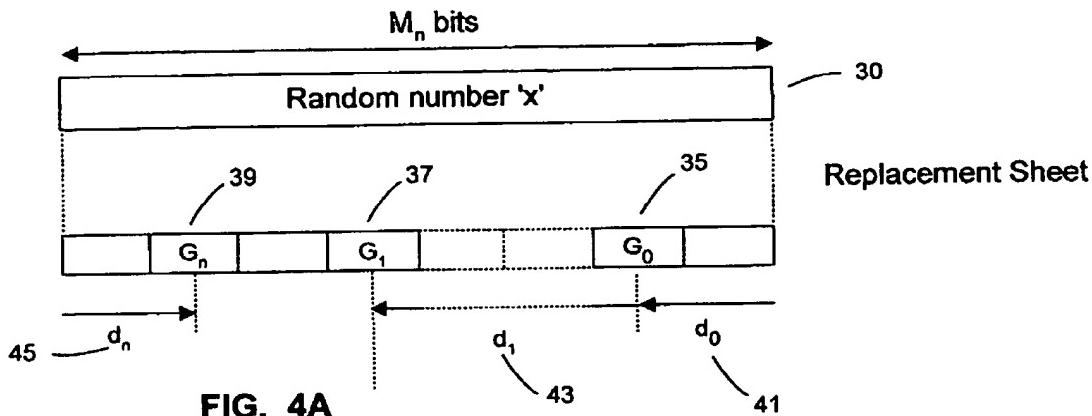

Table for M_n

Binary Group number $G_n - G_1 G_0$	Bit number	Bit position
0	$b_0, b_1, b_2, \dots, b_k$	$x_0, x_1, x_2, \dots, x_k$
1	$b_0, b_1, b_2, \dots, b_p$	$y_0, y_1, y_2, \dots, y_p$
m	$b_0, b_1, b_2, \dots, b_q$	$z_0, z_1, z_2, \dots, z_q$

FIG. 4B

$$M_{\min} \leq M_n \leq M_{\max}$$

Table for M_n

Binary Group number $G_n \dots G_1 G_0$	Bit number	Bit position
0	$b_0, b_1, b_2, \dots, b_k$	$x_0, x_1, x_2, \dots, x_k$
1	$b_0, b_1, b_2, \dots, b_p$	$y_0, y_1, y_2, \dots, y_p$
m	$b_0, b_1, b_2, \dots, b_q$	$z_0, z_1, z_2, \dots, z_q$

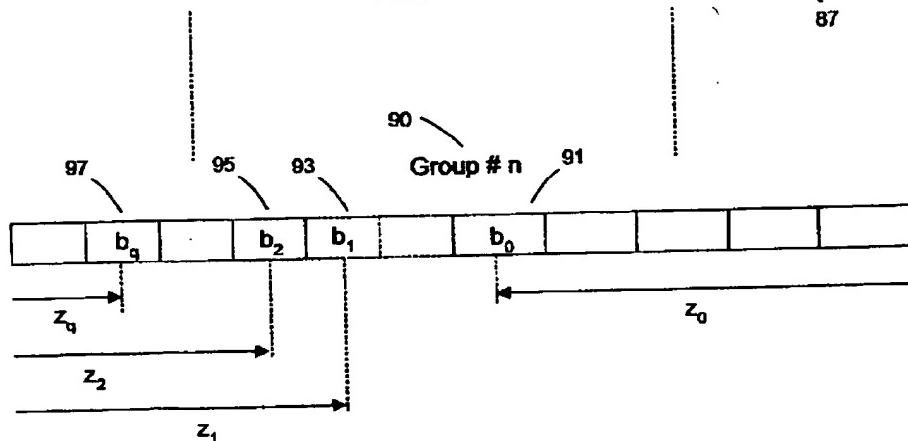

FIG. 5C

Patent Application Publication Nov. 7, 2002 Sheet 6 of 14 US 2002/0164020 A1

The diagram illustrates a table structure used for performing sequences of functions based on binary input values. The table has two main sections: a top section for binary values and a bottom section for function sequences.

Top Section:

Binary value $b_k b_2 b_1 b_0$	Sequence of Functions performed
0	$f_1(x)$ $f_2(x)$ $f_n(x)$
...	...
K	$u_1(x)$ $u_2(x)$ $u_w(x)$

Bottom Section:

Binary value $b_k b_2 b_1 b_0$	Sequence of Functions performed
0	$f_1(x)$ $f_2(x)$ $f_n(x)$
...	...
K	$u_1(x)$ $u_2(x)$ $u_w(x)$

Annotations with callouts point to specific parts of the table:

- Callout 100 points to the header cell for binary values.
- Callout 101 points to the header cell for the sequence of functions.
- Callout 103 points to the first row of the table.
- Callout 105 points to the second row of the table.
- Callout 109 points to the third row of the table.
- Callout 110 points to the fourth row of the table.
- Callout 111 points to the fifth row of the table.

FIG. 6

Replacement Sheet

The diagram illustrates a 'Replacement Sheet' with a table. The table has two columns: 'Binary value' and 'Sequence of Operation Functions performed'. The 'Binary value' column contains binary digits $b_k \dots b_2 b_1 b_0$. The 'Sequence of Operation Functions performed' column lists functions $f_1(x), f_2(x), \dots, f_n(x)$ for row 0, and $u_1(x), u_2(x), \dots, u_w(x)$ for row K. Row 0 is labeled with a circled '0' and row K with a circled 'K'. A bracket labeled '100' spans the first two columns of the first row, and another bracket labeled '101' spans the first two columns of the last row. A bracket labeled '103' spans the first column of both rows. A bracket labeled '105' spans the second column of both rows. Dotted lines indicate intermediate rows between row 0 and row K.

Binary value $b_k \dots b_2 b_1 b_0$	Sequence of Operation Functions performed
0	$f_1(x)$ $f_2(x)$ \vdots $f_n(x)$
\vdots	\vdots
K	$u_1(x)$ $u_2(x)$ \vdots $u_w(x)$
